Education

University of Maryland, College Park

Expected in May 2026

Bachelor in Computer Science

College Park, MD

GPA: 3.7/4.0

Work Experience

Technology Assistant

Sep 2023 - Present

University of Maryland, College Park

College Park, MD

- Assist in troubleshooting technical issues and deliver support to end-users, demonstrating strong problem-solving skills and attention to detail.
- Perform research on emerging technologies and best practices in software development, sharing insights and recommendations for improving existing systems and methodologies.
- Analyze user feedback to identify recurring technical challenges and propose innovative solutions to improve user experience.

Research Experience

Undergraduate Research Assistant

May 2024 - Present

University of Maryland, College Park

College Park, MD

Mentored by Dr. Xuanzi Qin, Professor of Health Policy and Management

- Conduct data cleaning and preprocessing to ensure the accuracy and reliability of analytical results.
- Examine large datasets using statistical software and programming languages like Python and SAS, identifying key trends and insights to inform decision-making.
- Participate in team meetings and contribute to project planning and execution, ensuring alignment with technical requirements and team objectives.

Projects

Management System

Tech Stack: Spring Boot, MyBatis, AWS S3, JWT

- Built RESTful backend services using the Spring Boot framework, providing management functions for employees, departments, and operation logs.
- Integrated AWS S3 storage service to support file upload and storage, improving data durability and scalability.
- Used JWT authentication to enable stateless session validation and enhance system security.

Housing Price Analysis

Tech Stack: Python, Pandas, NumPy, Scikit-learn, Matplotlib/Seaborn

- Developed a data analysis and predictive modeling project to evaluate key factors influencing housing prices using real-world datasets.
- Performed data cleaning and preprocessing, including handling missing values, feature engineering, and normalization to improve data quality and model performance.
- Built and evaluated multiple machine learning models to predict housing prices, comparing performance using metrics such as RMSE and R^2 .

Skills

- Backend: Python, Java, C++, MySQL
- Frontend: JavaScript, HTML, CSS, Vue
- Framework/Tools: Spring Boot, Maven, Pandas, NumPy, LangChain, scikit-learn
